

Khapisov Malik Khapisovich

AI Engineer

Phone number: +7(926) 093-62-54

E-mail: malik.khapisov@gmail.com

Telegram: t.me/mkhapisov

Github: <https://github.com/mkhapisov>

Moscow, Russia

Education

Bauman Moscow State University – bachelor's degree **September 2020**
– **June 2024**

Field of study: "Math and Computer Science"

Bauman Moscow State University – magistracy degree **September 2024**
– **June 2026**

Field of study: "Math and Computer Science"

Experience

Samsung AI Center Moscow – Computer Vision Engineer **December 2024**
– **Present**

During the work in Samsung I've

- developed a **Monocular Depth Estimation** model, achieving $\delta_1 > 0.95$ and $\text{AbsRel} < 0.05$ on average in zero-shot evaluation across 6 real and 2 synthetic validation datasets, using ViT-L architecture and trained from scratch on 7 synthetic datasets (~1M train samples);
- researched **multi-task learning** for joint monocular depth estimation and **panoptic segmentation**;
- worked on **monocular novel-view synthesis** and **3D object detection** models;
- developed a **unified segmentation model** for semantic, instance, and panoptic segmentation using a shared architecture, weights and training dataset.

Research & Projects

- Master's thesis on "Modeling of stochastic effects in nonlinear dynamical systems": <https://github.com/mkhapisov/Magistracy-thesis>

- Solving the problem of face recognition using MTCNN detector and classifier based on ResNet18 architecture: <https://github.com/mkhapisov/Face-recognition/tree/master>
- Bachelor's thesis on “Application of the Galerkin stochastic method to the analysis of regression models”: <https://github.com/mkhapisov/Diploma-work>
- Coursework on the topic “Investigation of bistable systems by methods of stochastic modeling of kinetic circuits”: <https://github.com/mkhapisov/Numerical-methods-coursework>
- Completed the Deep Learning School course on Computer Vision and NLP

Key skills

Programming Languages: C/C++, Python, SQL

ML/CV: PyTorch, NumPy, OpenCV, depth estimation, segmentation, object detection

Tools: Linux, Git

Languages: Russian native, English B2

About me

I'm 23 years old, graduated from Bauman Moscow State Technical University with master's degree and have 1.5 years of experience in Samsung AI Center. I'm interested in developing AI solutions and production-oriented computer vision systems, want to further improve my current skills. Open to relocation and don't require relocation assistance.
